- CompTIA A+
- CompTIA Security+
- Cyber Security Systems Administration Technical Certificate, Purdue University Northwest
- Full-Stack Web Development Technical Certificate, DigitalCrafts

WORK EXPERIENCE

United States Air Force Dec 2018 – Present
Communication/Navigation/Mission Systems Specialist

- Expeditiously troubleshoot and repaired forty-two aircraft discrepancies during aircraft launches leading to on-time departures and the successful completion of 241 combat missions.
- Completed 229 KC-135 scheduled and unscheduled aircraft maintenance tasks on time which helped reduce aircraft time-on-ground, and generated full mission-capable aircraft that enabled the offload of 51 Million lbs. of fuel to U.S. and coalition aircraft

United States Navy Mar 2012 – Dec 2017
Aviation Electronic Technician and Plane Captain

- Performed 187 aircraft inspections, and launched, and recovered 194 combat sorties equaling 1,253 flight hours, resulting in a 100 percent mission completion rate.
- Mentored and trained five junior Sailors to achieve aircraft inspection qualification, boosting work center productivity by 45 percent.
- Aided in correcting 7,560 aircraft maintenance discrepancies, and completed fifty special and phase inspections generating 1,841 flight hours.

SOFTWARE DEVELOPMENT PORTFOLIO

Information Technology Skills

- Computer hardware and software troubleshooting, Cybersecurity skills, JavaScript, React, Node.js, Express, PostgreSQL, Bootstrap, HTML, CSS, Git, API, and DOM manipulation

SpaceX Launch Tracker Application [GitHub](#) | [Website](#)

- Member of a three-person team that developed a front-end web application to track SpaceX's past and future space launches using JavaScript, HTML, and CSS
- Designed user interface and user interaction functionalities.

Weather Watch Application [GitHub](#) | [Website](#)

- Developed weather application in ReactJS, CSS, and HTML allowing users to search weekly weather information by zip codes within the U.S.
- Accomplished all software development life cycle tasks.

Xzibit E-Commerce Application [GitHub](#) | [Website](#)

- An e-commerce web application developed with Reactjs, JavaScript, CSS, and HTML. The application allows users to shop for products on a website that meets modern trends. The website is responsive and made simple for users to have a great user experience and interaction.
- Accomplished all software development life cycle tasks.
